

12/27/2021

Dear St Ann's Home Community,

Unfortunately there are 5 new residents on the Special Care Unit that were diagnosed with covid last evening. These families will be contacted individually. We have also identified 2 additional staff members on the SCU that are covid positive – they are asymptomatic and were identified through contact trace testing this morning. We will continue to test SCU employees today and tomorrow to help identify any further cases. The SCU remains on red precautions and those residents that consent to testing will have their first round of PCR testing today. We had 2 additional non-clinical staff members test positive for covid and they had no direct resident contact. As you know, all team members are required to be vaccinated against Covid -19 per state and federal regulations. Staff are actively monitoring all residents at St Ann's Home given the increase in Covid 19 cases in Monroe County. The staff of St Ann's will continue to do everything we can to keep your loved ones safe. Should you have any questions regarding this or anything related to Covid 19 please send them to: covidquestions@mystanns.com

Sincerely,

Senior leaders and medical staff of St Ann's Home
